DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. (hereinafter Brown, U.S. Patent No. 6,665,838).

In regard to independent Claim 1 (and similarly independent Claim 2), Brown teaches a method for presenting content from the page in a distributed database. In a preferred embodiment, a server receives a request from a client for a page from the database wherein the page has a plurality of links to linked pages in the database. The server retrieves the page and generates a set of thumbnails of the linked pages in the database. The server then sends the page and the set of thumbnails to the client (Col. 2, lines 24-31; compare with Claim 1 (and similarly Claim 2), **"... a central database storing said plurality of stored documents therein; and a user display device for displaying thereon at least one of said stored documents, said central database forwarding said at least one document to said user display device pursuant to a given user query, said at least one document containing a plurality of images, a first of said images being a full image and the remainder of said plurality of images being thumbnail images, whereby when a user of said user display device**

selects a given thumbnail image from said remaining plurality of images, the central database forwards the full image corresponding to said given thumbnail image").
